

AUDIT VERDICT: LIKELY PHISHING

CRITICAL THREAT: This URL exhibits strong patterns matching known phishing signatures, brand impersonations, or invalid security certificates. Do not interact with this page.

RISK SCORE

85 / 100

ANALYZED TARGET URL

https://secure-login-paypal-verification.com/login.php

Risk Factors Detected

HIGH

No HTTPS Connection — Transmission is unencrypted and vulnerable to interception.

HIGH

Suspicious Top-Level Domain (TLD) — The TLD (.com) is highly associated with phishing campaigns.

HIGH

Phishing Keywords Detected — URL contains suspicious terms: login, secure

LOW

Hyphen in Domain Name — Often used to spoof brand names (e.g., brand-security.com).

HIGH

Brand Spoofing / Impersonation — The domain contains names similar to popular targets.

CRITICAL

Invalid/Missing SSL Certificate — The site lacks a valid SSL certificate, indicating an insecure or fake connection.

Technical Metrics & Parameters

Target URL Length	54 characters
HTTPS Encryption Status	Yes (Encrypted)
Top-Level Domain (TLD)	.com
Subdomain Depth Levels	0 levels (Normal)
Phishing Keyword Hits	2 detected (login, secure)
SSL Certificate Status	Invalid / None
SSL Expiration Period	N/A
Registered Domain Age	12 days (Young Site)
Domain Registrar Name	NameCheap, Inc.

Actionable Security Mitigation Plan

- 1 DO NOT ENTER CREDENTIALS** — This domain exhibits strong phishing signatures. Never input passwords, credit cards, or personal data.
- 2 Perform Password Resets** — If you have already entered credentials on the scanned site, change the passwords for those services immediately.
- 3 Enable Multi-Factor Authentication** — Ensure MFA/2FA is active on all core accounts to prevent unauthorized access even if credentials were leaked.
- 4 Report Hostname to APWG** — Forward the malicious URL to anti-phishing networks (e.g. APWG, Google Safe Browsing) to aid active blocking.
