

AUDIT VERDICT: SUSPICIOUS INDICATORS

WARNING: Potential risk indicators detected. The domain is young, lacks encryption, or contains suspicious subdomain depth. Proceed with caution.

RISK SCORE

ANALYZED TARGET URL

http://my-new-crypto-project.xyz

Risk Factors Detected

- HIGH** No HTTPS Connection — Transmission is unencrypted and vulnerable to interception.
- HIGH** Suspicious Top-Level Domain (TLD) — The TLD (.xyz) is highly associated with phishing campaigns.
- LOW** Numeric Characters in Domain — Hostname contains random numbers, typical of fake URLs.
- CRITICAL** Invalid/Missing SSL Certificate — The site lacks a valid SSL certificate, indicating an insecure or fake connection.

Technical Metrics & Parameters

Metric Parameter	Observation / Value
Target URL Length	32 characters
HTTPS Encryption Status	No (Unencrypted)
Top-Level Domain (TLD)	.xyz
Subdomain Depth Levels	0 levels (Normal)
Phishing Keyword Hits	0 detected
SSL Certificate Status	Invalid / None
SSL Expiration Period	N/A
Registered Domain Age	3 days (Young Site)
Domain Registrar Name	Hostinger

Actionable Security Mitigation Plan

- 1 Verify Sender Identity** — If you received this URL via an unexpected message (email, SMS, social media), verify the sender's identity.
- 2 Inspect for Typosquatting** — Double check the hostname characters for look-alike characters (e.g., 'arnazon' instead of 'amazon').
- 3 Avoid Financial Transactions** — Do not process any card payments or connect digital wallets on suspicious websites until verified.
- 4 Scan Local Machine** — Run a local anti-malware scan to ensure no drive-by scripts or cookies were downloaded.
